

AmTopp Stretch Film is produced in four plants located in Lolita, TX, Houston, TX, Charlotte, NC and Phoenix, AZ, with our Lolita plant being the largest production facility in the United States. We produce the most cost-effective engineered films in the industry. All products are made using the best technologically advanced equipment and premium raw materials. We are committed to quality and our customers.

Machine Film: Designed for high speed automatic and semi-automatic operations. We offer Ultra High Performance machine films (LoadStar Plus ELB, Apex AM1) High Performance machine film (X-treme EHB) and a Premium Value film (Performance EPB) to accommodate all applications and load types.

Hand Film: Designed to securely unitize irregularly shaped and difficult-to-wrap loads. We offer Ultra High Performance films (LoadStar HLP/HLB) Prestretched film (PSB) High Performance film (Stiff HSB) and Premium Value film (Performance HCB) for all applications and load types.

Specialty Film: Various colored and UVI stretch films in both machine film and hand film are available. We also offer PET Bottle Film and Conversion Film products.

AmTOPP STRETCH WITH THE BEST

Founded in 1991, Inteplast Group is the largest manufacturer of integrated plastics in North America, offering a wide variety of quality products. Inteplast Group and all of its personnel strive for the highest degree of quality performance in all aspects of operation. This is achieved through clear and well documented systems and procedures along with a creation of standards that can be monitored at each stage of the operation. Proper training and an establishment of clear individual objectives and accountability, allow our employees to meet high performance expectations while continuously aiming for improvement. With this commitment to excellence, we continuously provide our customers with products and services that meet the highest of standards.

Our 700-acre Plant in Lolita, Texas

Headquarters: 9 Peach Tree Hill Road, Livingston, NJ 07039

Since 1991*

Engineered—Ultra High Performance Films

LoadStar Plus Machine Film—ELB “New Metric Widths”

LoadStar Plus is engineered with a metallocene enriched formula and produced on state of the art, multi-layer extrusion equipment. It is the perfect choice for any semi-automatic to high speed automatic systems due to an easy release. It offers the utmost performance at light gauges or in down-gauging. It is a one side cling film.

LoadStar Hand Film—HLP/HLB

This technologically advanced Hand Film exhibits unparalleled strength in lighter gauges while allowing extreme down-gauge opportunities.

LoadStar Prestretched Hand Film—PSB

Highly engineered premium PRESTETCHED hand film uniquely formulated with superior puncture properties to grasp and hold corners on “C” loads. Unrivaled load-holding force, cling, clarity and unchallenged neck-down for maximum load surface coverage. It reduces film weight/load by as much as 40% versus traditional hand films for lower cost/load and ultimate cost savings. Ergonomically designed light-weight rolls are mechanically prestretched for operator safety and increased productivity by reducing operator fatigue, stress, and labor intensity.

Apex Machine Film—AM1 “New Metric Widths”

Utilizing a base of leading edge Metallocene resins, Apex offers savings through superior performance. It is a very machine friendly film that replaces thicker, obsolete films.

High Performance Films

X-Treme Machine Film—EHB “New Metric Widths”

Exceptionally designed, multi-layered film for optimum performance with total versatility regardless of the load shape & weight. It has a quiet unwind and excellent clarity.

Stiff Hand Film—HSB

This hand film combines reduced neck-down performance, while maintaining excellent puncture resistance and yield.

Premium Value Films

Performance Machine Film—EPB

Engineered for consistent and quality performance on all general purpose applications. It performs up to 250% maximum pre-stretch depending on the application.

Performance Hand Film—HCB

This is our conventional Hand Film. A two sided film that can be used to secure a variety of loads in standard gauges.

Specialty Films

Color— Black, Blue, Red, Yellow, Orange, Green machine film and hand film

UVI—EUB, EUH, HUB

PET Bottle Films—EXB, AML

Conversion Films—CEV, CHV, CLV, CRV
